

LIVING IN A NUTSHELL

Few interior design books are as hands-on and inspiring as Janet Lee's small spaces DIY décor guide, *Living in a Nutshell*. Lee's mantra for transforming tiny apartments and nooks of all kind is to delight, dazzle and divert. With inspiring photography by Aimée Herring and a handy ranking system to tell you how long each of the more than 100 projects will take to complete, this book is as practical as it is fun. Lee gives the reader plenty of bang for their buck with a "Look, there's more!" inset that offers an extra tip to make each project even more unique. Perfect for those looking to makeover their compact cottage, apartment or doom room dwelling.

EMPTY ARMS

Determination and perseverance are what it took for Bethlehem author Erika Liodice to publish her first novel, *Empty Arms*, a truly inspirational read. When main character Catherine Chase was forced to put her newborn up for adoption at the tender age of 16, everyone told her she would later move on and have a wonderful life with a husband and children when she was ready for them. Now 39, Catherine learns that she and her husband Paul are infertile, and the hope of ever becoming a mother again is instantly shattered. Refusing to give up on motherhood, Catherine risks everything to reconnect with her long-lost daughter. *Empty Arms* beautifully illustrates the powerful bond between a mother and a child, under even the most challenging circumstances.
